

Picafuel for Fleets

Monitor and control your fleet's operations to improve efficiency and mitigate fraud

The Core Components of Fleet Management

Fuel is the largest operational expense, taking up over 30% of total fleet operating costs. Yet it is also one of the hardest ones to track and control. Instead of being able to drive fuel-related strategic initiatives that will improve efficiency and increase the bottom line, fleet managers are buried under never-ending and time-consuming manual tasks.

Efficient fleet management requires automation of fuel-related tasks, including abilities to track, monitor and analyze telematics and to prevent fraud in real-time. With the right software, fuel managers can reduce OpEx and save fleets millions of dollars annually.

Picafuel's fleet management solution optimizes fleet efficiency by monitoring vehicles, drivers, and expenses. Picafuel's management capabilities, verification methods, advanced analytics and mobile fueling features monitor fuel consumption and reduce fuel fraud, significantly cutting costs. Picafuel leverages digitalization, telematics data, mobile and the cloud to provide fleet managers with the most cutting-edge digital solution for making their business efficient and fraud-free.

Picafuel's Benefits

Visibility into fuel consumption

Reduction of OpEx by controlling costs

Advanced monitoring with actionable insights

Fuel fraud prevention

OUR SOLUTIONS

Fuel Consumption Management

Reduce OpEx by tracking your fleet's fuel consumption and spending

Minimize your largest operational expense - fuel. Monitor and record fuel consumption across your fleet. Use tracking data to gain visibility into costs, to control spending in real-time and for cutting expenses. Authorize fuel consumption and prevent security and fraud issues.

Main Features

Anomaly and Fraud Detection

Detect suspicious transactions in real-time. Analyze and approve every transaction with identity-confirming credentials from three different authentication factors categories (MFA).

Periodic Restrictions

Set flexible and dynamic restrictions according to spending amounts, location, time, date, product and cost criteria.

Route Restrictions

Set fueling restrictions and limit consumption when trips diverge from approved routes.

Insightful Reports

Analyze vehicle performance and fuel cost behaviors.

Transactions Management

Oversee every transaction

OUR SOLUTIONS

Asset Management

Maximize uptime with end-to-end control of your fleet assets

Efficiently manage and oversee all fleet's assets. Leverage management capabilities like automated maintenance notifications and driver and vehicle onboarding to gain insights into your fleets. Use those insights to streamline processes and gain a holistic view of your assets to maximize uptime. Capabilities are complemented with friendly support for any requirement.

Main Features

Automated Maintenance Notifications

Define maintenance threshold, get automatic notifications based on odometer readings, and schedule maintenance accordingly.

Driver Support

Instantly resolve drivers' queries with in-app support.

Driver and Vehicle Onboarding

Activate, suspend or terminate vehicles and drivers instantly.

OUR SOLUTIONS

AVR - Automatic Vehicle Recognition

Mitigate fraud and save millions of dollars annually with digitalized and secure transactions

Leverage Picafuel's white-label mobile app to ensure that only approved drivers fuel the approved vehicles at approved stations. Picafuel takes care of the heavy lifting by collecting telematics at every refueling and using advanced algorithms to analyze and validate every transaction. Eliminate the need for complex software integrations when preventing fueling fraud with zero hardware involved!

Main Features

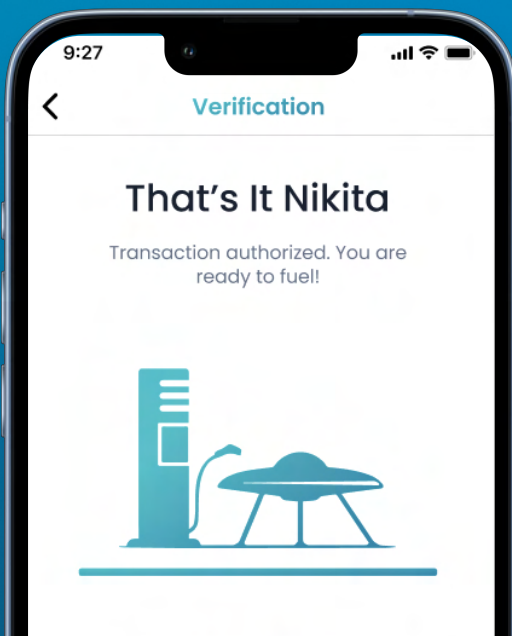

Simple and Quick Refueling

Eliminate the need for hardware by authenticating drivers and authorizing transactions through our app in a digital, secure and no-touch solution.

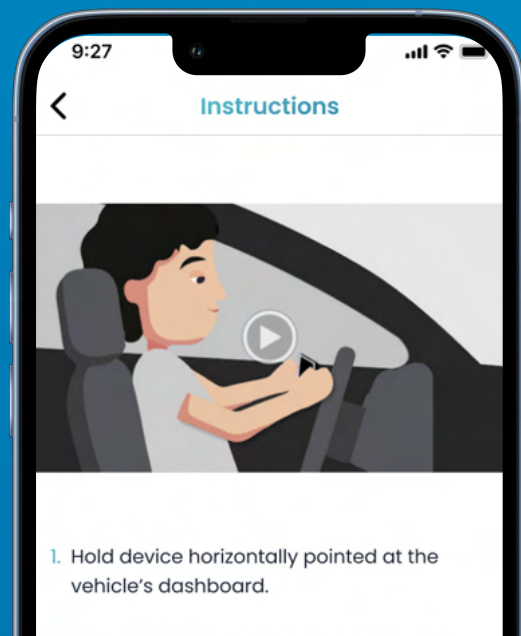

Offline Capabilities

Approve transactions even when the cellular network is down based on predefined business rules.

4

OUR SOLUTIONS

EV

Mixed fleet management made simple - complete control from a central hub

Use our “vehicle-agnostic” solution to efficiently govern and monitor mixed fleets from a centralized and single platform. Picafuel eliminates the struggle of managing ICEs and EVs on different platforms. Enjoy cohesive fleet management that reduces friction and saves you time.

Main Features

Charging Information

Track all transactions: time, date, stations, and more.

Reports

Analyze vehicle performance and charging cost behaviors.

Reimbursement Management

Allow your drivers to charge wherever they want and easily get reimbursed.

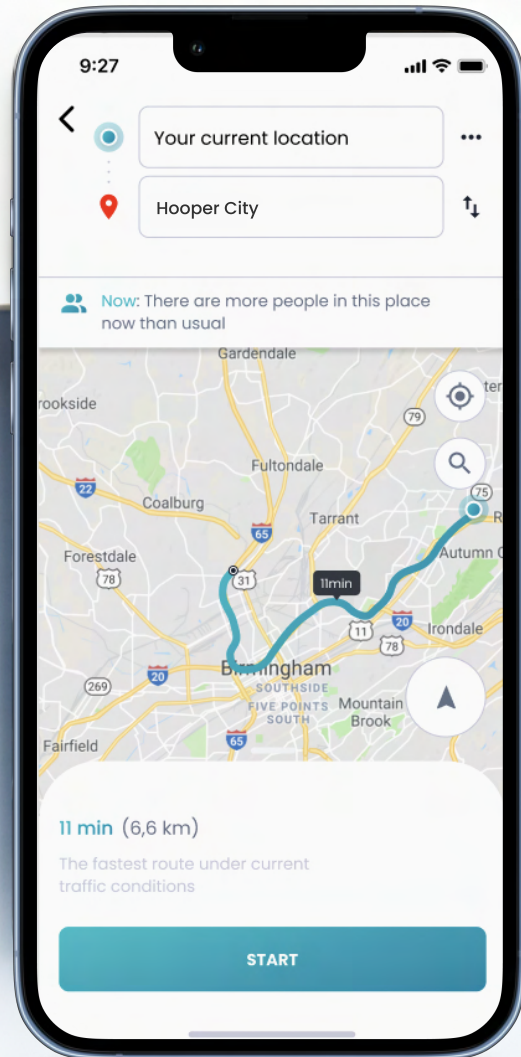

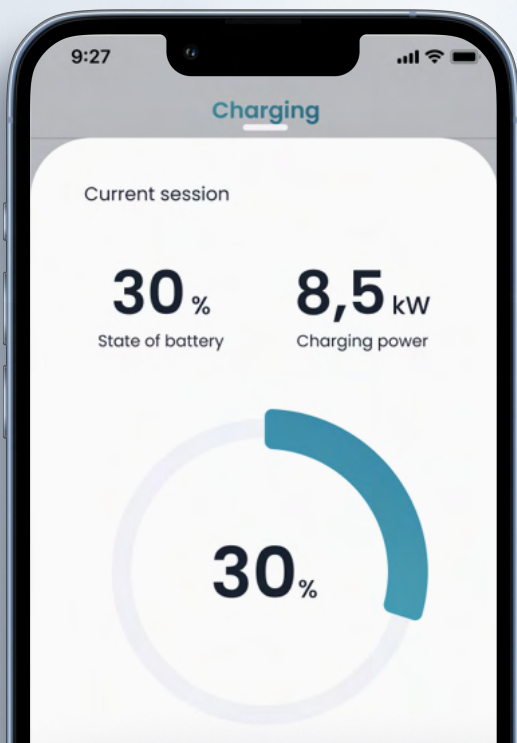

Mobile Charging

Eliminate the need for any hardware: authenticate drivers and authorize transactions through our app.

Navigation Tool

Help drivers navigate to the best stations based on prices, opening hours, facilities and more criteria.
